DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 9 is rejected under 35 U.S.C. 102(b) as being anticipated by Shimarak et al. ("Shimarak"). Shimarak discloses a contact protection housing 30 for at least one terminal 40 which is mounted on a component 20 and in which an opening (see col. Lines 35-40 and figure 4) for introducing potting composition 70 is made, the housing part comprising a thin walled cap whose edge 30a rests on the component 20 by initial tension.

Allowable Subject Matter

Claim 9 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 10-15 are allowable. Regarding claim 9, the prior art does not suggest the housing as claimed, including the combination of all the claimed elements, the combination including that the cap is in the form of a cylinder and including the protrusion and concave flanks as claimed. Regarding claim 10, the prior art does not suggest the pump as claimed, including the combination of all the claimed elements, the combination including that the cap is in the form of a cylinder and including the protrusion and concave flanks as claimed. Regarding claim 11, the

Art Unit: 2833

prior art does not suggest the method as claimed, including the combination of all the claimed steps, the combination including the adapter between the cap and nozzle as claimed.
